

Leon Harrocks

Curriculum Vitae

Hello

My name is Leon Harrocks, I am a graphic designer and my mission is simple: to create beautiful, striking and memorable work. I feel a witty idea and sound rationale are key to the success of every project.

The passion I have for my profession means that I treat every project with respect – from new identities, brand guidelines and brochures, to websites and art direction.

I pay attention to detail. I love to create eye-catching colour palettes and choose the right typeface for the job, sometimes I design my own. I like working with photographers and illustrators and enjoy the process of realising my concepts. I work closely with copywriters and also write headlines and copy for guidelines.
